TEAM EUROPE

Driving Innovation

When it comes to entrepreneurship, HHL takes the lead — among business schools and across Europe. With About You, Delivery Hero, IONIQ and Trivago, HHL alumni have launched four of Germany's unicorns. That is no accident — at HHL, we live and breathe entrepreneurship. Textbooks can't teach you how to think like an entrepreneur, how to sense whether a business idea has potential, or how to have the courage and strength to take a risk. HHL takes a practical approach. Entrepreneurship is an integral part of the curriculum. We regularly invite entrepreneurs, investors and other key players in the startup world to share their experiences with our students. Our students' success is the best measure of our success: HHL alumni have founded over 280 startups and created more than 25,000 jobs!

DIGITAL SPACE

At HHL, we encourage our students to apply their learnings in real life as soon as possible. With DIGITAL SPACE, we also offer a coworking environment where students who start up companies — even with external team members — have access to free office space, infrastructure and a like-minded community, to take the first steps on their entrepreneurial journey. DIGITAL SPACE is free for HHL students and enables them to “just do it” instead of “just talk about it”.

HHL SpinLab — The HHL Accelerator: A Startup Incubator in Leipzig's Creative Center

If I had to pick one highlight of the Global Immersion Seminar, it would certainly be the MIT Media Lab. Research results don't have to be highly scientific. It is the clever reapplication of existing tools and technology that surprisingly facilitates the creation of inventions. That is what I am looking for when developing new products for our customers.

“

At HHL, I especially appreciate the good reputation and solid training, but also the family atmosphere and the friendly interaction with each other. I realized that there are three levels we learn on in our MBA studies: first, the contents of the lectures; second, the experiences of fellow students, which we share in our discussions; and third, that you learn a lot about yourself. By constantly pushing yourself as close as possible to your performance limits, you learn a great deal about how you deal with stress and how to set the right priorities. Especially as an engineer, I noticed how I experienced a complete change of perspective during my MBA studies and now approach problems in an entirely different way.

Robert Riesebieter

The flexible structure of the innovative HHL part-time MBA program has been specifically designed to cater to the unique needs of a diverse group of students.
